Common Practice and Sharing Session Time:
Give and Take

Intelligent Robotic

- Delivery Robot
- Disinfection Robot
- Cleaning Robot
- Customized
- Sales and Marketing
- Maintenance and Support
- Technology transfer/Training
- Partnership

Geospatial (GIS)

- Technology R&D and Application
- Dashboard/Platform Development
- Database/Big Data and Integration
- Experience Gallery/Command Center

Smart City

- Event showcase
- Partneship/Consortium collaboration
- Product Talk/Technology sharing/Consultancy
- Grant,Tender and paperwork
- Course/Knowledge gathering

Research and Development

- R&D matching grants
- AI, Robotic, IoT and Smart City components
- Collaboration and partnership
- Technology/Service provider

STEM Education (STREAMLAB 4.0)

- Robotic Arm (Dobot)
- Humanoid (LEJU Aelos)
- 3D Printing & 3D Modelling Software
- Augmented Reality (AR)
- Laser Engraving
- DIY Mini Projects
- Computer Vision (AI)
- Automation
- Programming (Java,Phyton,ROS,Block)
- Hardware (Arduino, Raspberry, ESP32..)
- Training and Sharing Knowledge

Urban Farming

- Hydroponic system
- Monitoring system
- AI and IoT Development
- Sales and Marketing

Training and Consultancy

- Industrial panel jury (Expo/FYP/Competition)
- Digital-Entreprenurship
- Internship programme/Talent Development
- University-Industry visit
- Corporate Sosial Responsibilites (CSR)
- Environmental, Social, and Governance (ESG)
- Knowledge Sharing/Consultancy

AI for Personal Creativity 🎨
Unleash Your Inner Artist with AI!

This month, we're exploring free AI tools that make creativity fun, fast, and accessible. Whether you're an experienced creator or a beginner, these tools will help you turn your ideas into reality and no complicated skills required. Let's dive in and get creative! ✨

Leonardo AI

Transform your ideas into stunning visuals! Generate unique artwork, illustrations, and images from simple text descriptions effortlessly.

- **Key Features:** Text-to-image generation, customizable styles, high-resolution outputs.
- **Use Case:** Create custom illustrations for your projects, social media, or digital content.

Suno AI

Create original music tracks in minutes and no musical experience needed!

- **Key Features:** AI-generated music, adjustable genres and moods.
- **Use Case:** Craft a unique soundtrack for your video, podcast, or personal project.

Transform your ideas into reality with these powerful AI tools

AUTOMATING WORK WITH N8N:
Boosting Your Productivity

Are you spending too much time on repetitive tasks? Introducing n8n, a powerful and user-friendly automati... platform that can revolutionize how we work. n8n allows us to create automated workflows, connecting differe... apps and services to handle tasks automatically, saving time and boosting efficiency.

CYBERSOLUTION TECHNOLOGIES

What is n8n?

n8n is a low-code platform that lets you design and run workflows to automate tasks across various applications. Imagine connecting your email, CRM, databases, and more to create seamless processes using a visual interface. It allows users to create workflows by connecting different "nodes," each representing a task or operation.

## Key Benefits of n8n Automation:

Boost Productivity
Automates tasks to save time for strategic work

Improve Efficiency
Ensures consistent and rapid workflow execution

Easy to Use
Features a visual interface for simple workflow management

Reduce Errors
Minimizes manual data entry, enhancing accuracy

Connect Disparate Systems
Integrates various tools for a unified workflow

EXAMPLE USE CASES FOR COMPANY:

Data Entry
Automatically transfer data between spreadsheets and databases.

Email Automation
Set up automatic email responses and notifications.

Social Media
Schedule posts and track engagement on platforms.

Project Management
Automate task creation and deadline reminders.

Customer Support
Automate ticket creation and improve response times.

Geographic information system (GIS)

GIS is a computer system for capturing, storing, querying, analysing, and displaying **geospatial data.**

Geospatial data describe both the locations and characteristics of spatial features.

Components of a GIS

Hardware
Any device can be used to access GIS applications.

Software
Any program either commercial or open source.

People
GIS professionals using dedicated GIS solutions.

Data
Any spatial or non-spatial data that is managed, stored, analysed, and distributed.

Method
Various analytical and processing techniques used to interpret and manipulate geographic data.

POWER UP YOUR DATA WITH POWER BI

Power BI

Power BI is a powerful tool for data visualization and business intelligence which can help to turn raw data into interactive dashboards and reports that are easy to understand and use.

Why Power BI ?

- User-friendly
- Centralized data view
- Real-time insights
- Improved reporting & analysis
- Data-driven decisions

Power BI Capabilities

Data Engineering
- Data warehouse dashboard
- Data pipeline monitoring

IT & System Engineering
- IT asset inventory dashboard
- Infrastructure monitoring

Finance
- Financial reporting
- Investment analysis

Human Resources
- Recruitment analysis
- Employee data dashboard

Smart City
- IoT device monitoring dashboard
- Crime mapping and analysis
